Signal Processing 79 (1999) 357–358

SIGNAL PROCESSING

www.elsevier.nl/locate/sigpro

Cumulative contents of Volume 79

Volume 79, No. 1, November 1999

Papers

E. Baccarelli and R. Cusani
Parameter identification of quasi-stationary Rayleigh-faded time-varying digital channels 1
LJ. Stanković and J.F. Böhme
Time–frequency analysis of multiple resonances in combustion engine signals 15
M. Kristensson, M. Jansson and B. Ottersten
Modified IQML and weighted subspace fitting without eigendecomposition 29
H.H. Tan, L.-X. Shen and J.Y. Tham
New biorthogonal multiwavelets for image compression 45
J.M. Rouvaen, A. Djebbari, A. Menhaj-Rivenq, Al. Djebbari and Z. Chama
An algorithm for signal reconstruction from its phase based upon least square criteria 67
K.V.S. Hari and B.V. Ramakrishnan
Performance analysis of a modified spatial smoothing technique for direction estimation 73
V.A. Kazakov
One-dimensional kinetic equations for non-Markovian processes and statistical analysis problems of systems driven by the asymmetrical binary Markovian process 87
S. Olmos, J. García, R. Jané and P. Laguna
ECG signal compression plus noise filtering with truncated orthogonal expansions 97
S. Chen and B.L. Luk
Adaptive simulated annealing for optimization in signal processing applications 117

Thesis alert 129

Announcement 131

Call for papers 133

Volume 79, No. 2, December 1999

Papers

V. Britanak and K.R. Rao
The fast generalized discrete Fourier transforms: A unified approach to the discrete sinusoidal transforms computation ... 135
J. Choi
Sufficient conditions of the redundancy-transform for the blind single channel identification 151
C. Malliopoulos, S. Bakamidis and G. Carayannis
Order determination and optimum harmonic reconstruction of quasi-periodic signals in noise 161
S.-T. Tzeng and H.-C. Lu
Genetic algorithm approach for designing higher-order digital differentiators 175
D.C. McLernon
On the evaluation of the 2-D complex integral in 2-D downsampling 187

Elsevier Science B.V.

P. Ladret, B. Latombe and F. Granada
Active contour algorithm: An attractive tool for snow avalanche analysis 197
B. Zeng
Reduction of blocking effect in DCT-coded images using zero-masking techniques 205
S. Ramanathan, V. Visvanathan and S.K. Nandy
A computational engine for multirate FIR digital filtering 213

Volume 79, No. 3, December 1999

Note from the Publisher

Papers

A. La Corte
Generation of crosscorrelated random processes 223
Ph. Courmontagne
A new formulation for the Karhunen–Loeve expansion 235
P.-C. Lo and Y.-Y. Lee
Real-time implementation of the moving FFT algorithm 251
A.E. Bashagha
VLSI generalised digit serial architecture for multiplication, division and square root 261
X. Lin and R.S. Blum
Robust STAP algorithms using prior knowledge for airborne radar applications 273
P.-L. Shui and Z. Bao
Construction of nearly orthogonal interpolating wavelets 289
L. Cohen, P. Loughlin and D. Vakman
On an ambiguity in the definition of the amplitude and phase of a signal 301
B.-F. Wu and C.-Y. Su
Arbitrarily shaped image coding by using translation invariant wavelet transforms 309
L. Johnston and V. Krishnamurthy
Hidden Markov model algorithms for narrowband interference suppression in CDMA spread spectrum systems 315

Fast communication

J. Lee and H.-M. Kim
MMSE multiuser detector with an adaptive blind an tenna array for DS/CDMA systems 325

Acknowledgements 329
